

A MISSING PIECE TO YOUR COMPLEX CANCER PUZZLE

What is CureMatch?

CureMatch customizes cancer therapies to match the biology of your individual cancer, hitting as many genomic biomarkers driving your cancer as possible.

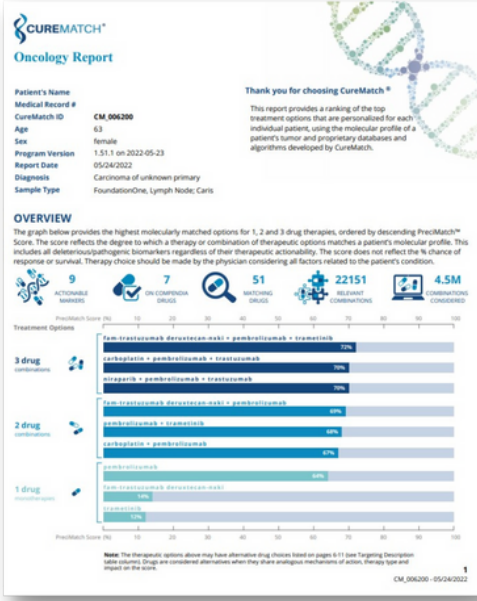

Customized Cancer Treatment

Sorting through millions of cancer therapy combinations to target the genomic drivers of your cancer is complex. But, with CureMatch's expertly curated knowledge base and Artificial Intelligence (AI) proprietary algorithms, we can match the best drug combinations to fight your cancer.

In fact, when cancer treatments are matched to your unique tumor, the progression-free (PFS) and overall survival (OS) increases. [I-Predict Study](#).

Benefits of CureMatch

- Help customize cancer treatments matched to target the biomarkers of your individual cancer
- Help avoid any potential unnecessary toxicities
- Help reduce the extra financial burden of ineffective cancer therapies
- Help improve your chance for a better outcome

How Does It Work?

1. Your Care Team uploads your Tumor and/or Liquid Biopsy Results into the secure CureMatch Portal
2. CureMatch analyzes the data by generating, filtering, scoring, and ranking combination therapies custom-matched to your individual cancer
3. CureMatch customizes the top best therapies matched to your individual cancer
4. The completed CureMatch Report is sent to your Care Team, via the portal
5. The doctor from your Care Team will review the results with you to come up with a plan
